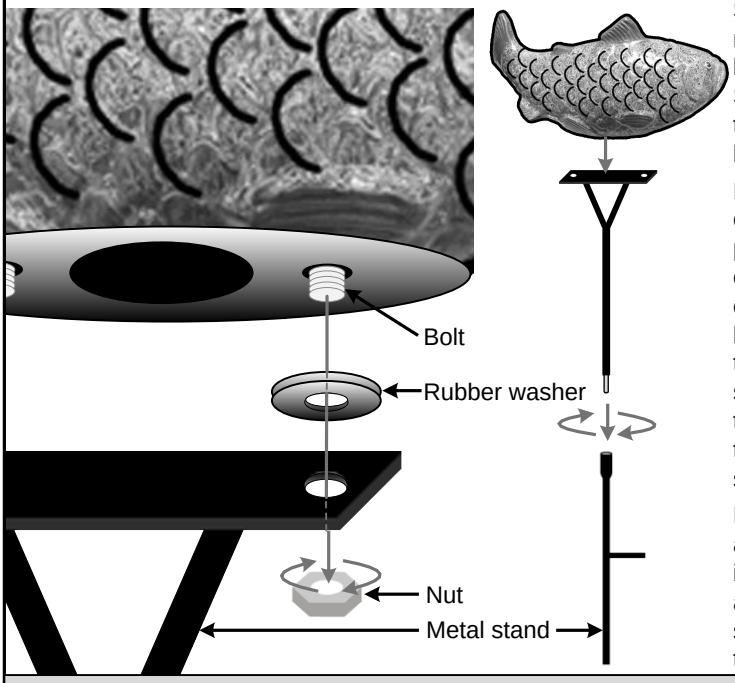
Ceramic Fish Stake

Assembly

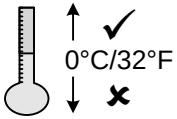


Screw the top half of the metal stand into the bottom half until tight. Stake the metal stand into the ground in the desired location.

Push the rubber washers over the bolt ends protruding from the bottom of the fish. Place the fish onto the metal stand, locating the bolts through the holes in the metal stand. Screw the nuts onto the bolts and tighten until the fish is held firmly and securely in place.

Please note: Ceramic fish are hand made, no two are identical. Color of finish and amount of blue speckles will vary from unit to unit.

Frost



Frost can cause damage, we recommend storing the product in a frost proof environment before temperatures drop below freezing.

Warranty

If within 12 months from the date of purchase this product fails due to a defect in material or workmanship. Smart Solar will replace or repair it free of charge.

The warranty does not apply to:
Damage caused by accidents, abuse, poor handling, frost or normal wear and tear. Products that have been subject to unauthorised repair or modification.
